"GUTHRIE" TEA

The Farm Problem For 1936

At this time of the year farm owners, farm operators and others interested in agricultural production are necessarily giving a great deal of thought and attention to the all-important problem of what to raise and how much to produce during the 1936 season.

Time was when this problem, if it was a problem at all, was a comparatively simple one. All that was necessary to do was to divide the land already prepared and the additional acreage to be prepared in the spring into two portions, one area to be seeded to wheat and the other to oats, with some provision for a small plot for vegetables for household use. In those days there were one or two standard varieties of wheat and oats and all the farmer had to plan in advance was which of these he would seed, and when the spring came to go ahead and seed it. Having done this, his chances of reaping a fair crop yielding him a reasonable return for his labor were pretty good.

But those days are gone and probably gone forever. Down the corridor of the past two decades, the problem of what to raise and how much of it has become more complex with each succeeding year, and to-day the question arises with so many complications and ramifications as to require the wisdom of a Solomon and the acumen of the proverbial Philadelphia lawyer, plus the insight of a skillful prognosticator if a reasonably satisfactory answer is to be the outcome.

If the farm operator in the prairie provinces wants to eliminate the gamble from his coming season's activities, he must not only be an experienced tiller of the soil and husbandman, but he also needs to be a student, a scientist, an economist and a meteorological expert. In other words he must achieve the unattainable.

When preparing his plans for the year's work the farmer not only has to take into consideration the condition of his land, the state of its suitability and preparedness for various types of crops, the probable availability of the kind of seed he would like to sow, the nature and extent of the hazard to which various crops and varieties may be subjected to deterioration and loss by insect pests and diseases, the probable effect of prospective weather conditions on those crops, the availability of nutriment in the soil required by different types of crops, the probable demand for the resultant yield in the local and world markets but many other factors which, for lack of space, must be dismissed in the auctioneer's phrase "too numerous to mention".

Many of these questions the farmer, because of his own circumstances and local conditions must decide for himself with very little assistance from outside sources, but fortunately there is aid available for him in his efforts to weigh probabilities and prospects of the effect of market trends, market conditions, national policies and to some extent even of international situations and relations on his intended activities, but even the information available on these factors can only be a guide, subject as they are and more particularly in recent years, to great and rapid fluxes.

One of the most valuable of these guides, entitled "The Agricultural Situation and Outlook, 1936" has just been issued by the Dominion department of agriculture with the co-operation of the department of trade and commerce. The information it contains is compiled by the sub-committee on the agricultural outlook of the National Advisory Committee on Agricultural Services.

The government pamphlet contains a careful and concise survey of agricultural conditions as they existed in Canada in 1935, together with industrial conditions as they affected agriculture, beneficially and adversely, and the prospective position of agriculture for 1936, including some specific conclusions which cannot fail to be of material aid to every farmer who reads it.

As the foreword to this 52-page bulletin says: "This annual review of the position of Canadian agriculture contains basic information which will assist farmers in planning their business operations in 1936. It is, of course, impossible to take into consideration drastic changes in international affairs which might develop before the close of the year. The report, however, presents an analysis of the factors most likely to affect farm income in the coming year."

A particularly valuable feature of the report is the summarized conclusions published by the sub-committee with respect to each of the important cereal grains and the several divisions of livestock, together with the reasons which lead up to these conclusions.

One who reads the bulletin cannot fail to be impressed with the fact that, generally speaking, the position of agriculture has shown improvement in the past year and that the factors in support of further improvement in 1936 are material, but it should be pointed out that the farmer who is carefully and intelligently studying the situation is the farmer who is in the best position to take advantage of this prospective continuing upward trend.

The pamphlet should be in the hands of every farmer in the prairie provinces and is worthy of study by all who are interested in the welfare of agriculture in the west and that means every citizen of the three provinces.

Brown rice, home economists say, has highest food value, than white rice because the bran and germ portions are retained. Feeding hens onions, turnips and other strong flavored vegetables is likely to give eggs an unpleasant flavor.

Be particular—buy your flour by name. Purity Flour has enjoyed your confidence for thirty years. Always uniform quality—milled from the world's best wheat—ensures complete satisfaction for every kind of baking.

PURITY FLOUR

Best for all your Baking

Different From Old Days

Passengers On S.S. Queen Mary Will Enjoy Perfumed Air

Anyone who has crossed to North America in an ordinary common or garden steamship when the Atlantic was in one of its tantrums will be amused or shocked, according to temperament, by the accounts of what is to be done for the comfort of passengers in the Queen Mary. Perfumed air will be available for the ladies, who can also, by a flick of the controlling lever, rid their rooms of cigarette smoke. The air in the cinemas and kitchens will be purified every three minutes, while in the 25 public rooms the atmosphere will be continually changed.

This serves to mark the tremendous change that has taken place since the coming of the "luxury liners" on the Atlantic ferry.

What early cross-Atlantic travel was like may be gathered from Charles Dickens' accounts of his first trip to the United States. That was in 1842, and the vessel was an early Cunarder, the Britannia, a three-masted one-funnel paddle steamer of 1,500 tons burthen.

The Britannia had a rough voyage, and Dickens, in a passage of a letter to John Forster, which was suppressed from "American Notes", says: "I have never been in the salon since the first day, the noise, the smell, and the closeness being quite intolerable." That was written six days out from Liverpool.

In the "Notes" the novelist says: "It was not exactly comfortable below. It was decidedly close, and it was impossible to be unconscious of the presence of that extraordinary compound of strange smells, which is to be found nowhere else but on board ship, and which is such a subtle perfume that it seems to enter at every pore of the skin, and whither of the hold."

Rather different, this, from the no doubt still "subtle" but more identifiable perfume the Queen Mary's passengers are to enjoy.—Manchester Guardian.

SELECTED RECIPES

DUTCH APPLE CAKE

1½ cup basic sponge
¾ cup milk
¾ cup butter
¾ cup sugar
1 egg
½ teaspoon salt
3 apples (approx.)
Cinnamon

Add beaten egg to creamed butter and sugar. Add this with milk to 1½ cups sponge and make up into soft dough with flour and salt. Knead lightly and place in well greased bowl in warm location (until double in bulk (about 1½ hours)). Roll out ¼-inch thick on board—cover bottom and sides of round shallow cake tin with the dough. Brush with melted butter and sprinkle with sugar.

Cut apples in sixteenths and press into dough standing on edge in circular rows. Sprinkle with cinnamon and place a few pieces of butter on top of apples. Cover and let rise for ½ hour then bake, with temperature about 380 degrees F.

This recipe makes two Dutch Apple Cakes.

The Vimy Pilgrimage

Some Employees Granted Leave Of Absence With Pay

One event presently warming the hearts of transportation executives is the Pilgrimage to Vimy organized by the Canadian Legion for July, 1936. Some 5,000 are expected to participate, and the mission in France will conclude with the unveiling of the Canadian War Memorial on July 28. Many have already shown their desire to co-operate with the boys who fought for us "over there" by enabling them to take advantage of this opportunity. In some cases four to six weeks leave-of-absence with pay has been granted to ex-soldier employees.

In their brief day they caught the torch, held it high. We, in our small way should help perpetuate the memory of those who passed it on.—Canadian Business.

All the radium that has been extracted from the earth would make only a two-inch cube, but it is valued at \$35,000,000. 2136

Many People Quote From Kipling's Works Without Knowing It

Familiar quotations from the works of Rudyard Kipling are legion, often tripping from the tongue without realization, by their users, of their origin. Here are a few of them:

"The Colonel's lady and Judy O'Grady are sisters under the skin."
"East is East and West is West, and never the twain shall meet."
"A rag, a bone and a hank of hair."

"You're a better man than I am, Gunga Din!"
"So I learned about women from her!"

"You're a pore benighted heathen, but a first-class fighter!"
"Lord God of Hosts, be with us yet, lest we forget—lest we forget!"
"Without benefit of clergy."
"I've taken my fun where I've found it."

"A woman is only a woman, but a good cigar is a smoke."
"The white man's burden."
"It's clever, but is it art?"
"A fool there was."
"Westward the course of Empire goes!"

Among Kipling's poems familiar as songs are:

"On the Road to Mandalay," "Danny Deever," "Rolling Down To Rio," "Fuzzy-Wuzzy and the Ladies" (I learned about women from 'er). Among the most familiar recitations in the world are Kipling's "Gunga Din" and "If".

An Important Discovery

Doctor Claims Nerves Can Be Spun Like Artificial Silk

Nerves have been taken apart for the first time and spun back together again like artificial silk at the University of Illinois. The spinning method was disclosed as identical with that used in the manufacture of rayon. The experiments were performed in the X-ray laboratories of Dr. George L. Clark, internationally known chemist. Discovery was of primary importance, the chemist asserted, because it increased knowledge of nerve disease.

In Berlin, a motorist who established a record as a dangerous driver is given a yellow cross mark on the windshield of his car.

Beard Great Protection

More Necessary In Morocco Than Night Fires Or Rifles

Flowing beards were more protective than rifles and night fires in Morocco for Kenneth Chapman and A. B. Cozens, who returned to Cambridge, England, after an adventurous trip in the lonely heights of the Middle Atlas Mountains. They gathered 2,000 strange insects, including many hitherto unknown species. Wild animals prowled near their little tent at night; swarms of enormous, biting insects invaded them; hostile tribes howled menacingly around them 7,000 feet up. But their beards saved them. "With the natives of Morocco it pays to grow a beard, which gives you status," said Chapman. "They have no respect for a beardless man. That was one reason. The other was to protect our faces from the giant wingless grasshoppers that were a terrible nuisance. They crawl onto your face and chew it."

Another Child Prodigy

Six-Year-Old Montreal Boy Plays Concert Program

Although he could not reach the pedals of his concert grand piano Andre Mathieu, six-year-old prodigy, displayed rare aplomb in his appearance in Montreal as guest soloist with a symphony orchestra of 30 pieces which played his concerto for pianoforte and orchestra.

It was the first of what critics are confident will be a series of triumphs for the youthful French-Canadian from Montreal. Andre is a son of Rodolphe Mathieu, pianist-composer and teacher.

Andre does not like to be called a child prodigy. He has studied piano ever since he was able to sit upright without assistance.

Argentina is not only crusading to destroy locusts, but is making tons of dried meal from the dead locusts, and exporting it for fertilizer.

The electric chair has claimed 375 slayers, including four women, at Sing Sing prison since capital punishment began there 44 years ago.

A Frenchwoman whose mate threw her off a cliff 100 feet high has refused to prosecute. Maybe he convinced her it was a bluff.

Grove's Laxative BROMO QUININE

Constant Care Is Needed For Proper Maintenance Of Prairie Shelter Belts

The growing of trees in the drier parts of the prairie presents many difficulties. These, however, can largely be overcome by proper care and cultivation.

As a result of surveys of hundreds of older plantations during the past summer it was found that where trees had been consistently well cultivated the growth has been much better than in the case of neglected shelter belts, the effects of drought not really serious and, what is generally referred to as winter killing was practically nil. The secret of this is the conservation of moisture in the soil.

A mulch of soil reduces evaporation, absorbs more rainfall, and most important of all, good cultivation keeps out grass and weeds which rob the trees of more moisture than any other controllable factor. Where plantations were neglected weeds and grass have become firmly established and have used up most of the available moisture with the result that the trees have suffered, making little, if any, growth and considerable killing has followed. In some aggravated cases whole rows of many species had succumbed while it was observed that only a short distance away, where the trees were well looked after, the damage was practically negligible.

Drifting soil has partially covered a few of the older plantations, and killed out some of the younger ones. In most cases, however, the older plantations are coming away well and are not seriously damaged. The soil should be removed with a scraper wherever possible. The greater part of the soil which might drift in, amongst trees, could be caught by a strip of stubble left outside of the trees or this land might be seeded to grass or a cover crop. A strip of at least 50 yards wide around the shelter belts should be so treated.

In planning a plantation a strip of ample width should be prepared and the ground well summer-fallowed to kill out native grasses and weeds and build up a reserve of moisture for the first year's planting. With the native grasses eradicated and most of the weed seeds killed by the summerfallowing it will be much easier to keep the ground clean after planting. Where fences are erected to protect the belts from stock, which is generally necessary, a space of at least fifteen to eighteen feet wide should be left between the trees and the fence to allow for permanent cultivation. Cultivation should be kept up between the rows as long as possible—three to four years in the case of 4x4 spacing. When it is no longer possible to cultivate between the rows, the trees, provided they are not pruned up, will shade the ground and keep down grass and weeds in the rows. The cultivated strip on both sides of the belt is of the greatest importance. If well worked it keeps grass and weeds from working into the belt and retains more moisture. This storage of moisture will support trees all summer together with what rain falls even through a very dry period. Drifts of snow formed in the belts during the winter are absorbed into the cultivator ground and add to the reservoir of moisture.

Under semi-arid conditions trees cannot be expected to succeed if neglected.

The caragana, ash and elm are the most drought resistant and dependable varieties. Poplar and willow if planted at all should be used very sparingly in the dry areas and then only in the most favorable locations.

By far the most important factor in the successful development of prairie shelter belts, and the one which cannot be too strongly or too frequently stressed, is the maintaining of wide cultivated strips along both edges.

Even if the Earth does last for trillions of years it will come to an end at last.

At a recent auction sale in Letchford, England, a piano was sold for 80 cents.

New Treatment For Diabetics

Research Scientists Make Report To Medical Society

A new dietetic treatment for diabetics, which has restored some patients to unrestricted diets, with no further need for insulin, was described to the St. Louis medical society by a pioneer research scientist.

Dr. Michael Somogyi, director of the bio-chemical laboratory of the Jewish hospital at St. Louis, Mo., reporting a joint study with Dr. Jerome Cook, of the hospital staff, readily assented that the treatment would not apply to all diabetic cases, although he indicated from his own experience with 274 cases that about 85 per cent might be aided.

Dr. Somogyi departed so radically from present dietary regimes that his treatment permits a more liberal use of sugar for diabetic sufferers. The accepted treatment has been the periodic use of insulin together with a carefully administered and restricted carbohydrate diet designed to spare the pancreas, the intestinal gland in which the disease has been held to centre.

New Silver Dollar

Will Be Laid Out, To Bear Portrait Of King George

A new silver dollar, the last to bear the portrait of King George V, will be in circulation soon. Inquiry at the state department, Ottawa, elicited the information that the necessary proclamation will appear in the near future. The machinery of the royal Canadian mint will then proceed to turn out the new coin. The new coin will be issued to supply the general demand for silver dollars. Arrangements were made for its issuance some little time ago, and as King George was alive in 1936, the year of its issue, the new dollar will bear his portrait and not that of the present king.

Coins issued after the close of this year, however, must bear the portrait of King Edward VIII. When coins bearing the portrait of the present king are struck the head will be facing right and not left as is the head of the late king. That is the custom.

Caught By Toothprints

Burglar Left Core Of Apple That Led To His Arrest

An apple he had left to the arrest of Josef Kozak, an unemployed workman living near Bremen, Bohemia. A thief broke into a villa at Bremen and stole the silver. In a fruit dish among his haul there was an apple. He ate this and threw the core on the carpet. That was a year ago. The police found the core and have kept it ever since. There has been another burglary of silver in the neighborhood. Kozak, who is alleged to have been acting suspiciously, was arrested. The manner of the theft reminded the police of the first burglary. They took Kozak's toothprints—and they are alleged to match perfectly those in the carefully preserved apple core.

From Pre-Historic Days

Two Relics Found Which Are Millions Of Years Old

Two relics of pre-historic days have just been brought to light at opposite ends of the earth. Fossilized remains of a marine reptile, about 40 feet long, which once inhabited a sea covering the centre of Australia millions of years ago, have been found in Queensland. It is a monster known as Kronosaurus Queenslandensis, and only four specimens of it have so far been discovered. Meanwhile the petrified trunk of a tree said to have been buried millions of years ago has been found in one of the coal mines in Don Basin, Soviet Russia. The trunk, weighing two tons, was found at a depth of about 500 feet.

About 15,000 thoroughbred horses are produced each year throughout the world.

Merited The Honor

Rudyard Kipling, Elected Right To Rest In Poets' Corner

The honor of burial in Westminster Abbey is rarely offered nowadays, but Rudyard Kipling, a greater honor, perhaps, than a title, or the Order of Merit.

There have been few burials there in recent years owing to lack of room, and it was understood some time ago that only ashes would be accepted in future for actual interment. Kipling was cremated, but that was not done in order to gain Abbey burial, he having intended that anyway. Without knowledge that he would be granted a place in the Poets' Corner.

The Poets' Corner is one of the most interesting parts of the Abbey, and is, in the south transept where visitors walking around looking at the monuments to the illustrious dead, find themselves right upon it without realizing the fact. Nothing that what seem to be the fagstones under their feet have inscriptions carved upon them, they receive something of a shock when they examine the surface, and find they are standing upon the grave of Chaucer or Dickens, Handel or Sir Henry Irving.

The reason for the overcrowded condition of the Poets' Corner is that in early times the honor was too freely conferred, and many men who may have been distinguished in their day, when it was easier to be famous than now, were buried there. Actors and musicians were also interred, and in addition to those named it includes Sheridan, Dr. Samuel Johnson, Lord Macaulay, David Garrick, and lesser people such as Sir William Davenant and Tom May, who were writers, and John Henderson, who was an actor. No such distinction would have been conferred upon them to-day.

There are other inconsequential people buried elsewhere in the Abbey, among them being Lord Farr, who had no other claim to distinction than that he lived to be 102 years of age.

The Poets' Corner, however, is unique in the national shrine, and Rudyard Kipling merits the honor.—St. Thomas Times-Journal.

To Erect Memorial

University Of British Columbia To Construct Recreation Centre

In Memory Of Former Dean Plans for construction of a Brock Memorial students' recreation centre on the University of British Columbia campus have been completed and work will begin within the next month on the proposed \$150,000 structure. The building will perpetuate the memory of Lieut.-Col. R. W. Brock, former dean of the university's faculty of applied science and internationally known geologist, killed with his wife and two other persons in an aeroplane crash at Alta lake, B.C., last summer.

Scientists To Test Theory That This Continent Is Slowly Drifting Westward

Are the Americas drifting westward? Did all the continents originally form a single immense land mass, which eventually broke up, Europe, Asia and Africa retaining pretty well their original status, while North and South America moved to the westward and Australia to the south? If so, is the drift still going on, and can it be measured? These are some of the questions that have been exercising the scientific mind in recent years, and which science, after its accustomed fashion, is taking steps to answer, slowly but surely.

This theory has come to be associated with the name of Wegener, the well-known geologist who advocated it as a substitute for the previously postulated "land-bridges" connecting America and Europe, to account for the similarities in existing fossil flora and fauna on the two sides of the Atlantic. Credibility was enhanced by the remarkable similarities between the eastern shore lines of the Americas and the western coasts of Europe and Africa, which, especially if consideration is restricted to the deep-water lines, would it has been claimed, fit into each other like the parts of a jigsaw puzzle.

One way of testing in a test of the theory, by settling definitely whether such a drift exists at the present time, and this the astronomers and geodesists have set themselves to do. A definite answer will necessarily be long in coming. According to the proponents of the theory, this drift at the present time might amount to two or three feet per year; admittedly, however, the amount is largely guesswork. Accepting this figure, it might amount in half a century to 100 or 150 feet, which is not much in 3,000 miles; such a quantity could, however, be definitely measured.

After several years of preparation, the International Astronomical Union and the International Geodetic and Geophysical Union, united in 1926 in sponsoring a worldwide campaign for measuring the differences in longitude between all the important observatories of the world, as well as many subsidiary stations. Canada participated through the Dominion Observatory, Department of the Interior, Ottawa, which occupied stations at Ottawa and Vancouver. In the United States the principal stations were at Washington and San Diego, California, while Greenwich, Paris, Algiers, Tokyo and many other important observatories also took a leading part. On that occasion attention was particularly focused on two main chains of stations, Algiers, Washington, San Diego, and Shang-

hai, in middle latitudes, and Greenwich, Ottawa, Vancouver, and Tokyo farther to the north. Thirty or forty other observatories also took part. With such a network area completely the question of drift could be settled, by repeating the measures after a sufficient interval.

In 1928 a similar program was repeated, more with the intention of strengthening the former network than with any hope of definitely settling the question after such a short lapse of time. If on the other hand a large drift existed it might be expected to betray itself. On this occasion the same two main chains of stations were occupied, with the addition of a third in the southern hemisphere, between 75 and 100 observatories participated.

The amount of observation and computation involved in such a task is enormous. Astronomical observations for local time were made at each observatory, on every clear night for between two and three months, and all the observatories were interconnected by special wireless signals sent out several times a day from all the powerful wireless stations in the world. Each observatory completed a preliminary computation of its own results, and the whole mass of data was handed over to the International Time Bureau, with headquarters at Paris, for digestion and correlation, a process which is still going on.

Though final results are not available, it is now known from the preliminary results that a comparison of the observations of 1926 and 1928, as was indeed expected, will not show definite evidence of any movement. This does not necessarily mean that a drift does not exist, but only that it is not large enough to definitely show itself in the seven intervening years. The unavoidable errors, entering into even the best observations, appear to be about sufficient to mask a displacement of the two or three feet, a year that has been suggested. At all events, if the drift exists at all it is not much greater than this amount. For a perfectly definite answer to the question we shall have to wait, perhaps, a generation. Science is sometimes slow, but sure in the end.

Richshaw Men Licensed

About \$7,000 Have Right To Fly Trade In Shanghai

Licensing of pullers of public richshaws in the International Settlement of Shanghai, China, has just been completed with 37,000 men possessing the right to ply their peripatetic trade. More than 800 candidates have been rejected because of age or unfitness. The licensing began in the autumn of 1934. It has been expected that more than the maximum of 40,000 pullers would try to be licensed during the period set aside for the procedure. Originally the plan was for the richshaw owners to nominate 30,000 pullers and the City Council 10,000, but subsequently the council granted the owners the right to nominate 40,000.

Making War On Emu

Farmers In Western Australia Fear Devastation Of Crops

Wheat farmers have asked the government to send troops or machine guns to Western Australia—to fight the emu. At a special meeting of the Emu Haters' Union it was stated that the position was now, owing to the ravages of the emu, much more serious than three years ago, when hundreds of acres of crops were ruined. Nearly 1,000 emus have been reported, and the farmers are determined to exterminate them before their crops are ruined. There are several former machine-gunners among the farmers in the district. It is pointed out. All that is needed is a few emu and some ammunition.

"Do Englishmen understand Canadian slang?"

"Some of them. Why do you ask?"

"My daughter is to be married to an Englishman and has just called to me to come across."

A Decorative Asset To Your Home

Planning to have your room re-done this Spring? Then you'll want a new throw rug or two. It brightens the room, softens the harshness of the living-room or entrance hall. You'll find this rug as easy on the eye as its matching pillow equally simple, and a grand way to use up colorful scraps. You may also use the wool canvas for a variety of other uses. The emus select, combine three shades of one color, or contrasting colors.

In pattern 5440 you will find complete instructions for making the set shown, an illustration of it and of the stitches needed; material preferred—wool.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is an Allen Brooks pattern book published

WHAT TO DO ABOUT "Acid Indigestion"

A WAY THAT RELIEVES THE CAUSE IN A FEW MINUTES

Many people who think they have "weak stomachs," or "indigestion," doctors say, suffer in reality from nothing more serious than acid stomach. And this common ailment can usually be relieved now, in minutes. All you do is take familiar Phillips' Milk of Magnesia after meals. This acts to almost immediately neutralize the stomach acidity that brings on your trouble. You feel like a new person!

Try this just once. Take either the familiar liquid "PHILLIPS", or the new Phillips' Milk of Magnesia Tablets. But watch out that you get the Genuine PHILLIPS' Milk of Magnesia. Made in Canada. ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Caroline Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia

Lived Under Five Emperors

Chinese Woman Claims To Be 110 Years Old

The Lester Chinese hospital harbors the most unusual patient ever treated in Shanghai in the person of a Chinese woman, 110 years old. This woman, Chang Sze, lived her whole life in the village of Kinglingschow, in the southwestern Shantung province, until the flood caused by the Yellow river made her a refugee. Accompanied by her 38-year-old great-grandson, Mrs. Chang made her way to the railway and for the first time in her life boarded a train. At Fukow her baggage roll containing her bedding, her one extra gown and the savings of a life time, \$23, was stolen.

En route to Shanghai she and her great-grandson lost the address of their only living relative, who was a policeman there four years ago but has now disappeared. Mrs. Chang, a widow for 90 years, has lived through the reigns of five emperors.

Usually Welcome

Teachers at Inverness, N.S., were going to strike, but the government prevented it by making a grant to pay salaries. Teachers, of course, work because they love to teach and are interested in the future of the children, but it must be admitted there is a certain amount of joy to be found in an occasional pay envelope.

It is believed that hens produce fewer eggs in very cold weather because they eat less food.

VICKS COUGH DROP

Medicated with ingredients of Vicks VapoRub

FULL 2 1/2 OZ. ONLY 15c

WORLD HAPPENINGS BRIEFLY TOLD

Nazi neo-paganism was denounced in a pastoral letter read from the pulpit of every Roman Catholic church in Germany.

Germany may expect a tax increase of 1,300,000,000 marks (approximately \$200,000,000) in the next fiscal year because of expenditures including rearmament, it was disclosed.

The immigration department was without information on the details of the plan to transfer 100,000 Jews from Germany, chiefly to Palestine, but also to other countries which had no anti-Semitic laws.

Twenty-three persons were killed and 63 injured when a snowslide derailed a train east of Yamagata in northern Japan. Three coaches, in which engineers and railway workers were riding were thrown over a cliff.

Despite a temperature of eight below, Dee Corrodi and his mates of the "Pondus" club took a dip in Lake Michigan. Corrodi said he hadn't. He froze his hands and feet.

Establishment of the national commission on unemployment and relief will be delayed until parliament has had an opportunity to pass the necessary legislation and appropriations, Prime Minister Mackenzie King announced.

Declaring that the relief cost per day for greater Winnipeg was very close to being the highest in Canada, Hon. W. R. Clubb, provincial minister of public works, warned the Winnipeg city council that unless costs were kept down support of the federal and provincial governments may be withdrawn.

An old Chinese dinner service was sold recently in London for \$550.

Soviet Airman In Luck

Orders To Make Parachute Jump Turned Out All Right

A parachute wedding has been celebrated in a village 80 miles from Moscow. The bridegroom, Michael Ivanovich, a Soviet airman, had arranged to be married when all leave was cancelled for parachute manoeuvres. They began on what was to have been Ivanovich's wedding day. As he took off, he was handed field orders, giving the place for his parachute jump. The seal was not to be broken until he was in the air. Up went the machine—and Ivanovich tore open the official envelope. He could hardly believe his eyes—the place given for his descent was the village where he was to have been married. No parachutist could have been more eager to obey his orders than Ivanovich. He landed safely from the skies at the feet of his bride—who had run from her house to watch the air manoeuvres. Before evening they were married.

Locate Buried Church

Diggers Found Bell Which Will Be Used Again

Lost for 49 years until found recently by divers, a bell buried when Walroa, New Zealand, was blotted out by the eruption of Mount Tarawera, has been dug up and will be hung in another Maori church. Two men, using rods from a tree, walked over the ground where the church was buried in 1886 until they found the spot where the things indicated that bulky metal object was beneath the ground. Diggers found the bell buried deep.

The only thing that stands between man and international peace is man.

A war never seems to go where there are names that are easy to pronounce.

Crochet Tells an Accessory Story

PATTERN 5525

"Picture hats" are back!—this time with bags to match, and a lovelier set than this just couldn't be imagined! You'll want it for your own when you learn how easily both may be crocheted. The hat with graceful, rolling brim, is just simple crochet. The bag is worked over outcushie braid to stiffen it. The bag, too, of simple crochet has decorative lines of rib stitch worked on afterward. It's lovely in a wool and rayon yarn.

In pattern 5525 you will find complete instructions for making the set shown; an illustration of it, and of all the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

\$5000 in PRIZES FOR THE OTHER NEEDLE'S ANSWER

I hereby agree to accept the decision of the judges as final.

Name: _____
Address of Dealer: _____ Dept. S.C.-1
Address of Dealer: _____

272 PRIZES in CASH and MERCHANDISE

2 PRIZES of \$50.00 EACH
10 PRIZES of \$10.00 EACH
10 PRIZES of \$5.00 EACH

250 FANCY SEWING BOXES containing an assortment of Coats' and Clark's Threads.

Think a moment—what would the needle say if Coats' and Clark's 6 cord Spool Cotton Thread—so firm and dependable no matter how fine—so strong and smooth and even. Every woman who sews with them KNOWS! Then bill in your suggestion for the empty space—and send it in TODAY. You have 272 chances to WIN!

THESE ARE THE CONDITIONS OF THE ENTRY

1. Cut the entry coupon along the dotted line—or get an entry blank from your own store and write your name in the blank space.
2. Remove top ticket from a spool of Coats' or Clark's 6 cord Spool Cotton and paste it on the back of the coupon on your entry. (To remove ticket from end of spool, steam it over a little of boiling water.)
3. Fill in your name and address and the name and address of your dealer—and send the completed form to The Canadian Spool Cotton Company, Dept. S.C.-1 P.O. Box 119, Montreal, P.Q.
4. ALL ENTRIES MUST BE POSTMARKED NOT LATER THAN APRIL 1, 1936.
5. The ladies' decisions will be final and winners' names will be published in this paper.
6. All entries become the property of The Canadian Spool Cotton Company.
7. No correspondence can be entered into regarding this contest.

COATS' & CLARK'S 6 cord SPOOL COTTON

SUNDAY SCHOOL LESSON

FEBRUARY 9

JESUS INSISTS ON RIGHTEOUSNESS

Golden text: Why call ye me, Lord, Lord, and do not the thing which I say? Luke 9:40.
Lesson: Luke 6.
Devotional reading: Proverbs 3: 13-18.

Explanations And Comments

The Tree and Its Fruit, Luke 6: 43-45. The kind of tree determines the kind of fruit; the kind of character determines the kind of deeds. As it is with trees, so it is with men: each bears fruit as it is in him to do, life being the outworking of the spirit that is within. This is one of the fundamental teachings of Jesus. He repeats it over and over again as the one great truth out of which noble living must come. Dr. Moffatt's translation of verse 45 puts the matter very clearly: "The good man produces good from the good stored in his heart, and the evil man from his evil: for a man's mouth utters what the heart is full of." And just as true is it to say that a man's life reveals what his heart is full of. The Parable of the Two Foundations, Luke 6: 47-49. Here in this parable Jesus divides men into two groups: those who carry out their sayings, life according to the principles he gave, and those who do not. The good life makes real demands of the one who would attain unto it. It is an easy thing to build upon the surface of the earth, but digging down to rock foundations is not so simple. That testing times will come to every life is certain, but well-built character will stand the strain. That character is well built that is founded on Christ's teachings, First Corinthians 10: 4. He that doeth the will of God shall abide forever.

Benefit Sick Children

The Duke of Kent has directed that the sum of \$50,000 raised for the national wedding gift fund be organized by the "Georgians" in commemoration of his wedding shall be handed to the Invalid Children's Aid Association to provide holidays for convalescing sick children of the unemployed.

You may spend a life-time becoming wise but can make a fool of yourself in a minute. 2136

Seeing Eclipse From Air

Astronomers Will Make Observations in Russia June 19

Observations of the solar eclipse on June 19, 1936, which will be visible over a wide area in the Soviet Union, will be undertaken from airplane and sub-stratosphere balloons. Fifteen Soviet scientific expeditions will be stationed along the path of the eclipse. Astronomers from the United States, England, France, Germany and Japan have asked permission to conduct independent observations there and others are expected to apply.

For Baby's Bath

More than that of any other member of the family, baby's tender, delicate skin needs the greatest care and attention. The soft, soothing oils in Baby's Own Soap make it specially suitable for babies, and its clinging fragrance reminds one of the roses of France which help to inspire it.

"It's best for you and Baby too." 22-28

An astronomical observatory which once stood on Mount Blanc is abandoned, but a weather station is still maintained on the upper slopes.

"The Star-Spangled Banner" was legally made the national anthem of the United States in March, 1932.

A FARMER BOY

ONE of the best known medical men in the United States was Dr. R. V. Pierce of Buffalo, New York, who was born on a farm in Pa. He noted early in his medical career that many of his prescriptions prepared from roots, herbs, and barks, such as "Golden Medical Discovery," produced astonishing results. He only founded a Clinic and Hospital in Buffalo, N. Y. Dr. Pierce's Golden Medical Discovery is an herbal extract which stimulates poisons from the intestines and tones up the digestive system. Pimples and skin eruptions caused by faulty elimination disappear and you feel the tonic and strengthening effect of this well tried medicine. Ask your Druggist seven Tablets 9 cents, liquid \$1.00 and \$1.50.

KING EDWARD MAY MAKE AN EMPIRE TOUR

London.—The diplomatic correspondent of the Daily Herald predicted that the king would tour the Empire following his coronation next year.

The Herald's story said during King Edward's absence his duties would be performed by a council of state composed of Queen Mary and his three brothers, the Dukes of York, Gloucester and Kent.

The newspaper's correspondent said it was felt there ought to be some kind of accession ceremony in all the Dominions, with the king present. He said it was possible there would be an actual coronation ceremony in each Dominion capital. Included in the tour would be an imperial durbar at Delhi, India, during the autumn of 1937.

The story said the proposed tour would last nine or ten months and that His Majesty would visit some of the chief colonies as well as the Dominions.

King Edward devoted himself to a series of diplomatic conferences at Buckingham Palace with important European figures.

Prime Minister Baldwin and Anthony Eden, foreign secretary, also conferred with many of the statesmen and diplomats here for the funeral of King George.

Turning aside from the solemn ceremonies in London and Windsor at which his father was buried, King Edward received Baron Konstantin von Neurath, German foreign minister; Maxim Litvinoff, Soviet foreign commissar; and other European notables.

It was the first time since the revolution that a Russian government representative had been received at Buckingham Palace.

The king received successively the Earl of Shaftesbury, lord high steward; Prince Ernest Rudige von Starhemberg, Austrian vice-chancellor; Baron von Neurath, Litvinoff and Nicolas Titulescu, Roumanian foreign minister and head of the little entente. His Majesty previously had met President Lebrun of France and Premier Paul van Zeeland of Belgium.

Prime Minister Baldwin conferred with Prince von Starhemberg, Litvinoff and Titulescu and was received by Prince Paul, regent of Yugoslavia.

Eden had luncheon with Litvinoff preparatory to the Soviet commissar's first audience at Buckingham Palace. The foreign secretary then received Prince von Starhemberg, Portuguese Foreign Minister Armando Monteiro, Hungarian Foreign Minister Koloman Kanya and Afghanistan's Foreign Minister Faiz Mohammed Kahn. Kanya later conferred with Baron von Neurath.

Eden was received by King Boris of Bulgaria and was host at a dinner to King Carol II. of Roumania. Early in the day he was received in audience by King Edward at Buckingham Palace.

Soviet circles here were jubilant over the events of the day. Anglo-Soviet understanding was seen as strengthened further by a conference between Litvinoff and Alfred Duff Cooper, secretary for war, which was attended also by the Soviet ambassador, Ivan Maisky. Marshal Fuchatzewski, chief of staff of the Soviet Red army, also conferred with Duff Cooper and Lord Swinton, secretary for air.

Crown Prince Frederick of Denmark and the Crown Princess left for Bath to visit their aged relative, Prince Arthur, Duke of Connaught, uncle of King George, whose health prevented him attending the funeral.

Snowslide Derails Train

Tokyo.—Twenty-three persons were killed and 48 injured when a snowslide derailed a train east of Yamagata in northern Japan. Three coaches, in which engineers and railway workers were riding, were thrown over a cliff.

The Cheltenham flyer, the United Kingdom's fastest regular train, recently completed its 1,000th run at its record speed of 73.5 miles per hour.

Power Firms Take Action

Federal Government Asked To Disallow Ontario Legislation

Montreal.—The Dominion government has been asked to disallow Ontario legislation, recently proclaimed, which cancelled contracts between the Ontario hydro commission and Quebec hydro-electric companies, it was learned here.

George H. Montgomery, K.C., stated an application to that effect has been filed by Montreal Light, Heat and Power Consolidated on behalf of the Beauharnois Power Corporation, one of four companies affected by the cancellation.

The application was filed with the deputy minister of justice, W. Stuart Edwards, at Ottawa, some days ago.

The action was the first step by Beauharnois in fighting the cancellation, it was stated. Recently a bond holder of Ottawa Valley Power Corporation entered action at Toronto seeking to have the act cancelling the contracts declared ultra vires.

Disallowance of provincial legislation may be executed by order-in-council without private or public hearings of the interests involved.

During the year the department of justice reviews the laws enacted by various legislatures but actual disallowance of a provincial statute is rare.

U.S. Soldier Bonus

President Roosevelt Has To Find Huge Sum To Meet Outlay

Washington.—President Roosevelt asked the United States congress for a \$2,240,178,375 appropriation to meet the soldiers' bonus bill.

Without mentioning the subject of possible tax increase to provide funds, Mr. Roosevelt wrote Speaker Byrns that the veterans' bureau had estimated \$2,237,000,000 would be needed for actually cashing the bonus, with the remainder for administrative expenses.

Meanwhile, veterans reported commercial interests were already competing for a share of the money to be distributed. The American Legion warned its members against pledging their bonus in advance, while New York brokers offered \$40 immediate cash for each \$50 bond. Some business houses, too, were seeking lists of veterans and their addresses.

Washington wondered whether significance could be attached to the absence of any recommendation for new taxes in the president's letter to Speaker Byrns. Mr. Roosevelt said that the administration was making a thorough study of the tax situation created by payment of the bonus and the invalidation of A.A.A. processing taxes.

Will Return To Geneva

Dr. Walter A. Riddell To Retain Position Held For Several Years

Montreal.—Dr. Walter A. Riddell, Dominion of Canada advisory officer accredited to the League of Nations, has explained satisfactorily to Prime Minister Mackenzie King the incident about oil sanction proposals which created such a stir throughout the country a few weeks ago.

The Gazette states in a despatch from its Ottawa correspondent: "It is officially stated," the despatch continues, the episode which resulted in the government issuing a statement some months ago "was due to misunderstanding."

Dr. Riddell would shortly return to Geneva and would continue to occupy the position he had filled for several years, the paper added.

Tribute Of News Vendors

Montreal.—The more poignant because of its being unheralded was the tribute to the late King George on January 28 by Montreal news vendors. They either stayed at home or joined mourning throngs in city churches. News-hungry citizens bought their papers in hotels, restaurants, or newspaper offices.

British Army Flyers Killed

London.—Three British army flyers were killed when their plane crashed near Port Sudan in the Anglo-Egyptian Sudan, the air ministry announced. Their names were given as Flying Officer Syllanus George Connolly, Lieut. Frank Vaughan and Under-Officer Frank Camppling.

His Majesty King Edward VIII.

QUEEN MOTHER ISSUES MESSAGE OF GRATITUDE

London.—Queen Mary issued from Buckingham palace a message of gratitude to the people of the United Kingdom and all the empire for their sympathy in connection with the death of King George.

The message was as follows:

I must send to you, the people of this nation and the empire, a message of my deepest gratitude for all the sympathy with which, at this time of sorrow, you have surrounded me.

It is indeed a gratitude so deep that I cannot find words to express it. But the simplest words are the best. I can only say with all my heart that I thank you.

In my own great sorrow I have been held up not only by the strength of your sympathy but also by the knowledge that you shared my grief, for I have been deeply moved by signs so full and touching that the passing of my dear husband brought a real sense of personal sorrow to all his subjects.

In the midst of my grief I rejoice to think that after his reign of 25 years he lived to know he received the reward in overflowing measure of the loyalty and love of his people.

Although he will be no longer at my side—and no word can tell how I shall miss him—I trust that with God's help I may still be able to continue some part at least of the service which for 42 years of married life we tried together to give to this great land and empire.

During the coming years, with all the changes which they must bring, you will, I know, let me have a place in your thoughts and prayers.

I commend to you my dear son as he enters upon his reign in confident hope that you will give to him the same devotion and loyalty which you have so abundantly to his father.

God bless you, my dear people, for all the wonderful love and sympathy with which you have sustained me.

Throgs Injured

British Officials Criticized Because Many Injured In Funeral Procession

London.—British officials, criticized because 10,000 persons were injured among the throngs gathered to watch King George's funeral, moved to prevent repetition of such incidents at London's next large gathering.

The Duke of Norfolk, earl marshal who was in charge of the funeral procession, and Police Commissioner Sir Philip Game, asked police superintendents in charge of sections along the procession's route to submit reports. On these reports, the officials expect to plan police coverage for controlling crowds at King Edward's coronation next year.

One of the contributory reasons for the disturbances was considered to be the rapid influx of spectators from outlying sections of the city.

Subways, buses and other transportation facilities poured 2,000,000 passengers into the city, it was pointed out. Most of the visitors arrived before noon while arrival of a similar number on jubilee day was spread over 19 hours.

It was believed the unfortunate events of the funeral would be used as a guide to prevent similar occurrences in the future.

Extending Boycott

Sanctionist Nations Apply Boycott

Geneva.—Some sanctionist nations are extending their "buy nothing from Italy" boycott to the so-called "deserter states," it has developed. These are Austria, Hungary and Albania.

A session of a committee of experts of the League of Nations on sanctions was informed, for instance, that Great Britain is purchasing material from Yugoslavia it hitherto bought from Hungary.

The committee decided that most members of the league are applying sanctions against Italy satisfactorily, but it will send out questionnaires to determine Italy's trade trends.

Spoke For Canadian Families

Man Who Took Part In Christmas Broadcast Is Dead

Ottawa.—The head of a family who spoke for Canada on the Christmas Day Empire broadcast with King George was buried here, the same day as his sovereign.

He was William Clement Richardson, 67, city weighmaster for 20 years and formerly a farmer at Hazeldean, west of here. Richardson and other members of his family spoke from their home, gathered around their Christmas tree, as representatives of the average Canadian family.

He died January 25, exactly a month after his participation in the broadcast.

Revenues Will Accumulate

Duchy Of Cornwall Will Not Go To King's Brother

London.—There is no ground for the current rumors King Edward intends to give the revenues from the Duchy of Cornwall to his brother, the Duke of York, who would become the Duke of Cornwall and York.

It is learned by the Canadian Press the decision will take considerable time and will depend somewhat upon parliament's action with the civil list. The latter will have to be changed in view of there being a bachelor king.

Wheat Conference Called

To Discuss Means Of Promoting Its Sale And Use

Ottawa.—Hon. W. D. Euler, minister of trade and commerce, announced he had invited grain growers, dealers, exporters, the wheat board, co-operative producers and millers to confer Feb. 25 in Winnipeg on means of promoting sale and use of Canadian wheat.

The minister's announcement said the conference was being called in recognition of the desirability of sustained action to promote sale and use of wheat "with no special reference to the present wheat surplus but rather to the general situation which promises to exist for years to come."

Will Be Delayed

Commission On Unemployment To Be Set Up Later

Ottawa.—Establishment of the national commission on unemployment and relief will be delayed until parliament has had an opportunity to pass the necessary legislation and appropriations, Prime Minister Mackenzie King has announced.

It had been the intention earlier to set up the commission the first of the year, but it was decided to give an opportunity for parliament to deal with the legislation first. This will be introduced as one of the government's first measures to be laid before the house.

HOW TO BE LONG-LIVERS.

Sir William Mulock of Toronto, who recently celebrated his 92d birthday, admits he is "living on borrowed time," but enjoys it just the same. Sir William, one feels, gets a lot of fun out of life, and has all his years. He loves fishing, and many men can share with him his enthusiasm for that sport. He hopes to fish for trout on May 1st, rain or shine, and for black bass on July 1st, the opening dates for the seasons when these fish may be legally caught. "That's worth living for, isn't it?" he asked his interviewer. Yes, and is worth waiting for in the opinion of this enthusiastic fisherman, who is also Ontario's chief justice. Sir William himself is reported as saying he quite realizes that his span of life may end at any moment.

To an Ottawa man who has turned 85 goes the credit for suggesting a way to fill in the time when one gets old or is out of work. He started two years ago to re-learn the art of skating, which he had known as a boy but had abandoned 68 years before. It came a bit hard at first, but he kept at it and presently got back his one-time skating skill. This winter he is going daily to the civic rink, where he skates. It is keeping him well and happy, and he is enjoying life nearly as much at 85 as he did at 18. His way of beating time may serve as an example to others. When one gets old or is otherwise laid on the shelf, go back to boyhood's sports—if one has the courage and stamina to do it—and so fill in the otherwise empty days.

A veteran of the early days in the Yukon when the "trail of 98" was beckoning the young and old from all sections of the continent, former judge of the supreme court of Alberta and one of the best known barristers in the province, His Honor Lieut.-Governor W. E. Walsh on January 28th celebrated his seventy-ninth birthday. Still more active than many men his junior by a decade and more, His Honor truly feels "79 years young." He was the recipient of many congratulatory messages on the occasion of his birthday. He was born at Simcoe, Norfolk County, Ontario, on January 28, 1857. Coming west in 1900, he was attracted by the Yukon rush and remained in the far north until 1904, when he moved to Calgary and settled in law practice. Walking helps to keep him in first-class physical condition.

PRINTING COMES TO AMERICA.

Stephen Daye was the first printer in the United States, but the establishment of the first print shop was really due to the Rev. Jesse Glover, a dissenting clergyman of England, who was wealthy, raised funds in England and in Holland, and contributed liberally himself to purchase needed equipment. He also engaged a practical printer (Mr. Daye), and in 1638, together with his family, sailed for America. Mr. Glover passed on during the voyage. By direction of the elders and magistrates, Daye set up the equipment and began business early in 1639. When Daye arrived, there was living in Cambridge a man named Samuel Green. He succeeded Daye in the business. While there is no record, it is presumed that Green learned the trade from Daye, as there is no mention of him as a printer until 1649.—Christian Science Monitor.

Trustees Buck Consolidation.

(Edmonton Journal.)

Trustees of school districts throughout the province are showing pronounced and unified opposition to the plan of Premier Aberhart for consolidation of school districts. It is indicated in a survey of day-by-day reports from many sections. Of the 25 school districts which in the past few weeks have discussed the projected legislation, all but one have voted condemnation of the plan—and that 1 decided to take no action until the complete bill is revealed upon presentation to the Legislature.

Branded.

"Are there any marks on the baby?" Bill anxiously inquired. The Doc looked the new arrival over very carefully, and replied: "Yes, she's marked C.O.D."

Weak with the Grippe.

Miss Anna Hepko, 10845 98th St. Edmonton, writes—

"I was so weak with the Grippe that it made me quite helpless. A friend told me to try Dr. Martin's Tonic Remedy. And it certainly got me on my feet, and built up my strength. That I wish to let everyone know of this Remedy. How quickly it acts and how reliable it is. Children will take it readily, no mixing or tussing. It contains no Laxatives or Narcotics. A quick acting tonic that builds up your Vitality. Dr. Emile Martin's valuable remedy for Coughs, Colds and La Grippe. Large bottle, price 75c., at Hayes Drug Store Stony Plain.

Don't Guess But Know

Whether the "Pain" Remedy You Use is SAFE?

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly is your family doctor. Ask him particularly about "ASPIRIN".

He will tell you that before the discovery of "Aspirin" most "pain" remedies were advised against by physicians as bad for the stomach and, often, for the heart. Which is food for thought if you seek quick, safe relief.

Scientists rate "Aspirin" among the fastest methods yet discovered for the relief of headaches and the pains of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest remember this.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

FLEMING'S FOLLY

BY LAWRENCE A. KEATINGE

SYNOPSIS

The story opens with Link Fleming addressing a meeting of Boone County cattlemen called to meet with the object of forming an irrigation company.

Roper Kilgo, the boss of the Rawhide and nearby ranges, who seemed to approve the plan, but was really opposed to it, had forced Soak Torney, a derelict mining engineer, whom Kilgo knew would be called upon to give his expert opinion in favor of the scheme, to reverse his earlier endorsement, and declare that irrigation in Boone county so far as Hamilton's plan was concerned, was only a wrong-headed way to waste money.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Kilgo stay behind and Helen accuses Fleming of trying to influence his sister and, as a result, ruin his "spread". Buzz shoots at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is uninjured. Helen is arrested. The doctor attends Townsend and dresses his wound. Kilgo Roper suggests taking Helen to her home, but she refuses and Fleming escorts her home instead. This incident causes Roper to declare open hostilities to Fleming.

Helen and Fleming form a partnership to provide irrigation for their own properties. Link goes home, and is surprised to find Kilgo there ahead of him. Kilgo tries to induce Link to drop his schemes, but when Fleming refuses, gives a signal by taking off his hat, and Link is shot at from outside the house.

Link kicks Kilgo out of the house. Buzz Hamilton is sentenced to three years imprisonment for shooting Buster Townsend.

On his way home after the trial of

Are You Tired—Listless?

Is your rest broken at night? If your kidneys need look GIN Pills. They will strengthen your kidneys and if you sleep better you will feel better and look better.

Buzz was over, Link meets Soak Torney, who starts telling Fleming why he withdrew his approval of the water scheme. Just as he was about to tell the name of the man who had forced him to do so, Torney is shot and killed by a rifle bullet. Link hunts around to find the killer, but finds nothing. He comes across Jackpot Mell watering his horse, and Jackpot warns Fleming that if he wished to live he had better leave the district.

(Now Go On With The Story)

CHAPTER VI—Continued

He gave up the search. "I'm obliged about the land. It's going to be worth a good deal more than you and Kilgo thought. Jackpot," he went on slowly, his brown eyes travelling over the man's light figure, "you could have killed Torney, and you wouldn't have turned a hair doing it. I have a hunch somebody made him talk like he did at the meeting. In fact, Soak told me so. Well," he ended, turning away, "I've got to money."

"Hold on. Mell's sallow countenance wore its accustomed look of masked decision but there was a brittle edge to his tone. "Link, you ought to quit these parts. Runnin' a place in town like mine, a man overhaars things."

"I see. Just a friendly tip, eh?" "Shore!" We always got on good enough, but I'm not the kind to keep mum to my friends. Seems like I can't remember who I heard talkin'." He frowned, then winked. "I've been lots of different places in my life. Found out it's mighty good sense to get elsewhere before trouble busts out."

"I never did own any baggage, Jackpot," was the drawled reply. "By the way, when you get to town tell the sheriff there's a corpse here for him to see."

Mell shrugged, then strode to his horse and mounted. He did not so much as glance back, but urged his roan along the spring bed in the direction of the road. Link followed afoot, watching until the man disappeared toward Rawhide.

He searched another half hour for tracks or some clue to the identity of Soak's killer. There was none. Hearing hoof-beats, he stepped out of the trees onto the road. To his surprise it was Honest John Mulrooney he saw, and Marty Bush, instead of the sheriff.

They pulled up. "Who's lyin' there?"

"Soak Torney. He and I were talking, and somebody shot him. I haven't found out yet who did it."

Bush dismounted. "Do you know why?" He nodded. "Torney hasn't been seen since the meeting, you know. He stepped out of the trees and stopped me. Started to say to me that he was going against the irrigation scheme at the last minute. Soak was all for it before, but somebody scared him into talkin' like he did. It looks kind of queer."

He broke up as Sheriff Stephen and the sheriff, pudgier figure of Coroner Ed. Sproggins rounded the bend, seated in a buckboard. They drew up and climbed out. Ames went at once to the man who lay on his side in the road. He pursed his lips, stood up, spying Fleming, then walked slowly toward him.

"I'm a-purged 'yer hangin' around. Link. After killin' a man most guys light out."

Ames looked at Fleming, then looked at Link. He stared blankly at Stephen, then looked at the puzzled uncertainty at Bush and Mulrooney. "You mean," he demanded at last, incredulously, "you think I killed Soak?"

The other grunted. "We got word you did. Where's the rifle? Had plenty of time to get rid of it, of course."

Sproggins nodded to this. The cattle agent and Mulrooney looked startled as they drew nearer. "Sheriff," if Mell told you I killed Torney, he lied."

Stephen jerked at his straggly grey mustache. "Oh, Jackpot's a smooth liar, all right. But I reckoned you'd say that. Self-defense, wasn't it?"

"I didn't shoot him at all. Soak stepped out of the trees as I rode along. He started to tell me who made him back down on the irrigation scheme at the meeting the other day. Before he got it out he was shot. I went after the fellow, but found Mell watering his horse at the spring. He claimed he didn't do it—and I couldn't find a rifle on him or anywhere around."

4 to 5 TIMES More Quickly Digested than Cod Liver Oil

Tired, jaded appetites need the stimulation of Cod Liver Oil. Scott's Emulsion helps give you a healthy, normal appetite PLUS added digestibility and vitality because it is an emulsified Cod Liver Oil in a solution of bone-building Hypophosphates of Lime and Soda. P.L.U.S. VALUES you get only in Scott's Emulsion.

SCOTT'S EMULSION

THE DIGESTIBLE COD LIVER OIL WITH THE FULL VALUES FOR SALE BY YOUR DRUGGIST

"Do you think I'd hang around here, waiting for you if I killed Soak?" If I was self-defence, I'd ride for you myself. If it was murder, I'd be miles away by now."

Silence fell. "That's yore story, eh?" Ames reached to his hip pocket and drew out a pair of manacles.

"First I'll take that skunk, Fleming. Yore yarn sounds worse to me. Had plenty cause to want Soak dead, didn't yuh? So yuh could maybe talk ranchers into the waterin' scheme? So long as he was around, the main authority on it, yuh couldn't make much headway. I'll have to take yuh in, Link."

Impulse assailed him to whip out his weapon and hold the sheriff at bay until he could make a swift escape. But he stifled this. It would brand him with the appearance of guilt. He was wholly innocent; the proper thing to do was to insist on that.

Stephen was stretching out his hands with the manacles when John Mulrooney uttered a dry chuckle and stepped close. "Why says Link killed Torney, Sheriff?"

"Jackpot Mell. Claims he hadda gift for dear life or he'd have got it too. Says he met Soak, who told him Link kept him prisoner, but he got away. Jackpot didn't know till Link shot that he followed 'em here."

The cattlemen grinned and shook his head. "Ever hear of Mell runnin' from a gunfight?"

"I'm, No, never did."

"Guess Jackpot means too late hours," Mulrooney drawled. "Too late on a man's brain like the tremens. Why, this killin' couldn't have happened that way. Ames—not without Marty and me knowin'."

We been with the last hour."

The lawyer started, uttering an exclamation. Even the unemotional Sproggins blinked and swiftly shifted his gaze to Link.

"Been with him an hour?"

"Have we, Marty, or not?"

The cattlemen sent each a match on his boot sole. "Of course."

Fortunately Stephens was not looking at Link at the moment, so that he had time to master the amazement that rippled over his tanned face. When Ames scowled back his expression was calm, uninformative.

"Huh! You claim that too?"

"Might as well, Sheriff. It gets me out of a jam, doesn't it?"

"A piercing look was the answer. "Come on, Ames. Forget this. It was just a little joke on Mell's part. I reckon," Marty urged. "Why, Fleming isn't a killer! And like he said, it's unreasonable to suppose that if he did shoot Torney, he would wait around an hour for you to come."

Stephen removed his hat and

scratched his head. "All right," he decided with irritated reluctance. "You can go, Link. But dang it, I'm givin' to look into this plumb thorough. Write to me, yuh didn't have a rifle along to-day?"

"I am."

"And you don't know how Torney got killed?"

"Haven't any idea as to the killer no."

"I'm ain't satisfied, by a dumb sight. Might hear from me later."

Relieved, but trying to keep his head of that fact from his face, Fleming sought his horse. A moment later he rode off with Bush and Mulrooney. When they were out of earshot he faced them.

"Well, what made you do it? Do you know who shot Soak from ambush?"

"Course not! But look here, Link, who did it?"

"Haven't any idea, Marty. Don't even know why Jackpot should want suspicion on me. Why should he try to put me away like Buzz, and maybe be for a longer time?"

Honest John looked troubled. "Yore too believin' in folks. Why, any dog with a sore foot can tell when it's hard walkin'." Guess you can't, though. Uh—Marty and I figured yuh ain't a killer, so we lied to Ames. Ain't sorry, neither. But . . ."

"He hesitated.

"Speak up, John. Both of you have something on your minds. I can see that plain enough."

They exchanged looks. "Yeah. You know that promise I made in meetin' to go along with yuh on this irrigation?"

"Sure. Bush spoke up too. I'm mighty glad you aren't scared of the plan, like all the rest of these old-fashioned cow prodders. Why, there never would be progress if everyone—"

"Wait, will yuh?" Mulrooney shifted uncomfortably in his saddle and stared into the distance. "That's what I'm getting at. Yuh see, my old woman's been tick a long time. And I had trouble with my steers when that spring went dry, and what with one thing and another, I'm hard up. Mind if I pull out of yore scheme?"

"Me too—if you don't mind, Link. Bush put it in."

Silence.

"I understand, boys," he said quietly. "You backed me in the meeting just for effect. For effect. For friendship's sake. Like you lied to Sheriff Stephens, because you didn't want to see me in trouble. That it?"

"Well . . ."

"You feel like the others, that irrigation is some crazy modern scheme for wasting money. I'm grateful for your backing," he said sincerely as he strove to conceal his disappointment. "I surely am. You did me a good turn both times."

"Aw, Link, you oughtn't to go into this water scheme. Why, everybody thinks yore plumb loco!"

The lawyer started for his horse where Bush and Mulrooney would turn off. The sullen sky was going a deeper grey, yielding slowly to night. The wind had sharpened to a brittle keenness and snow continued to fall in a steady, melancholy swirl. The Star Loop owner stopped his horse.

"I believe in it, boys."

Bush expelled tobacco juice. "Buzz doesn't, though. If Helen goes in with yuh like I hear yore persuadin' her to, fo'ller'll say you had Bush put away so she could manage their spread."

Link looked sharply at the cattle agent. "Folks would gossip about sunshine if there was nothing better to go through with this thing. I'm set on it, sure it will work. They shook their heads. "There'll be opposition, Link. Like this Soak Torney affair. And that shootin' the other night. Was Kilgo out of a friendly call, or what?"

Fleming smiled. "Not exactly. Do you suspect anyone?"

(To Be Continued)

An Electrical Snow Storm

The phenomena of a thunderstorm occurring simultaneously with a snow storm was witnessed recently by residents of St. Joachim, Ont. While the snow was falling lightning flashed vividly and thunder boomed loudly.

Cyclists may be ruled from Australian highways as a menace to motorists.

Little Helps For This Week

If thou canst believe, all things are possible to him that believeth. Mark 9:23.

So high is grandeur to our dust, So near is God to man, When duty whispers low, Thou must.

The youth replies, I can.

—R. W. Emerson.

Know that "impossible" where truth and mercy, and the everlasting voice of nature order, has no place in the brave man's dictionary. That when all men have said it is impossible and have gone elsewhere and you are left alone, then your time and opportunity have come. It is for you to do now, ask no counsel from anyone but God, and it will be possible for you to write on the eternal skies the record of a heroic life.

In the moral world there is nothing impossible if we bring a thorough will to it. Man can do everything with himself; but he must not attempt too much with others.

A Cherished Possession

The prayer book used by the late King George V. at the funeral service in St. George's chapel, Windsor Castle, for his father, King Edward VII, is the cherished possession of C. E. Bower, of the robes worn in royal purple. Mr. Bower was a chorister at the funeral services for both King Edward VII and Queen Victoria.

At some English affairs, it is possible to hire an altar at 6 cents a mile.

Children's Colds Should Have This Safe Treatment

Young Mothers Benefit from Two Generations' Proof of This External Treatment For Fighting Colds.

IT AVOIDS CONSTANT "DOSING"

There's nothing like VapoRub to soothe a young mother, and mothers of two generations, anxious to help and colds, have depended on Vicks VapoRub for generations.

Just rubbed on throat and chest at bedtime, VapoRub acts two ways of colds.

1. By stimulation through the skin, like a poultice or plaster.

2. By inhalation of the penetrating medicated vapors, released by body heat and breathed in direct to inflamed air passages.

Continuing through the night, this combined vapor-poultice action loosens phlegm—mothers irritate membranes—eases difficult breathing—helps break congestion.

A Practical Guide for Mothers Each year, more and more families are being helped by fewer colds and shorter colds. Vicks VapoRub has been clinically tested by practicing physicians, and further proved in everyday home use by millions. Full details of the VapoRub in each package of Vicks VapoRub.

Nominations for Council.

Stony Plain 1935 Town Council held its last meeting Wednesday, Jan. 23, with Mayor Oatway in the chair. Several business matters were attended to, which finished up affairs for the year. A feature of the meeting was Mr. Michael's handing in his resignation as Fire Chief for the town, but the councillors refused to accept it, owing to the good work Mr. Michael has performed since taking over the job.

The nomination meeting for new members to sit at the 1936 Council board was held on Monday, Feb. 3rd, from 11 a.m. to noon. The retiring members are Mayor Oatway, Councillors Michael, Barth and Breikreutz.

Mayor Oatway was re-elected by acclamation.

Councillors nominated—
Dr. B. A. Walton
Ex-Councillor R. Breikreutz
John Armbruster
L. Kowensky
John Meteler
John H. Miller
The election will take place on Monday next, Feb. 10.

Secret Members Confer.

Tuesday and Wednesday seen a caucus in Edmonton of the 56 Social Credit members of the Legislature confer, and grappling with major items to be brought before the session of the House, which opens today.

The selection of members to move and second the Reply to the Speech from the Throne was among the first matters taken up.

All important bills to be presented to the House, and which were discussed during the caucus, included those providing for establishment of a social credit plan; "recall" of members; and taxation changes.

Organiser Shandro's Plan.

A delegation from the Basic Dividend Ass'n will seek an interview with Premier Aberhart soon after the session opens on Thurs. Feb. 6 to demand payment of the \$25 a month promised during the Provincial election. A Shandro, ex-M.L.A. and organiser, stated in an interview in Edmonton on Saturday, and added "We will be ready with a delegation and intend to see the Premier."

The Rock-throwers Abroad.

The 19th annual Northern Alberta bonspiel opened in Edmonton Monday, with over 50 rinks entered, 25 of these from outside points. It is expected this season's event will be the biggest in the history of the bonspiel. The play is taking place at the six City rinks, with the opening games at 9 a.m.

Our Curling club has representatives in at the big bonspiel: Art Mundt 1, M. Kast 2, G. Oppertbauer 2, J. W. McCulla skip.

Hockey Notes.

Junior hockeyists had a new team to tackle in their game here Saturday night—These were the North Edmonton Dynamers. Local boys took care of the visitors pretty well—so, well that, at the end of the fourth ten-minute period the play stood 7-1. In the 10-minute overtime period each team captured a goal and finished 8-1; letting it stand as a tie at this score. Henry Trapp refereed in his usual satisfactory manner.

Juniors are billed to play a game in Edmonton this week.

Now It's Broom Ball.

It is some time since local sport fans witnessed a broom ball game on local ice. A game of this description is billed for tonight, Feb. 6, at the Enders rink. Following the game there will be skating with music. Refreshments will be on sale, and the admission price is as low as 35 cents a couple for the whole show.

S. P. Phone Co.

The shareholders of Stony Plain Mutual Telephone Association held their annual meeting on Saturday, Feb. 1, in Lucknow schoolhouse, with President W. T. Propp in the chair. The report of the secretary-treas. was read and adopted. The officers whose terms had expired were re-elected. The officers now are: Pres., W. T. Propp; Sec.-treas., D. L. Davidson; Directors: J. W. Bowser, A. H. Schinke, W. M. Washburn.

Farm Implement Prices Up.

It is reported that farm implement manufacturers have circularized their agents forecasting an increase in the price of farm implements "due to increases in the cost of material and labor." Western Liberal members who have arrived at Ottawa for the opening of the House, are said to be much exercised over the situation. One Western member who bought a binder in 1935 which cost him \$268, reports that his dealer in the West informs him that the same binder will cost him \$300 this year.

25 CENTS.

Opening of the Legislature.

The Legislative Assembly of Alberta opens today, the 6th. The usual ceremonies will be carried out, the only departure from the accustomed order being the elimination of social functions of any kind, it has been announced.

At the opening of the Dominion Parliament, which is set for the same day as that of the Alberta Assembly, the usual order of ceremonies will be followed, with traveling escort, guard of honor, and firing salute as in previous years, but with all social events cancelled. All officials wearing uniform, either military or civil, will have a mourning band.

The example thus set by the Dominion authorities will be followed in connection with the opening of the Alberta Legislature on Thursday.

A Movie in Stony, March 3d

Tuesday, March 3, is the Big Massey Harris Demonstration Day in Stony Plain. Movie Pictures will be shown in Sommerfield & Mayer's spacious auditorium. Speakers from the Massey Harris Co. will be in attendance.

Stony Plain and District.

Rev W. E. Sieber, a former pastor, preached the sermon at the United church Sunday evening.

Mr. F. W. Yates is taking a keen interest in the performance of the curlers at the big bonspiel in Edmonton this week.

Mr. McDawvech the radio-tician from Vancouver, was in Stony this week, attending to his clients' needs.
